What is Baplie file?

A BAPLIE file is a standard Electronic Data Interchange (EDI) format used to send a vessel bay plan showing the location and other data of every container on a ship.

What is Russian stowage?

The stacking of containers of different lengths in the same pile on a ship – for example a 40ft container on two 20ft containers. » [Online Glossary](#).

How do you read a bay plan container?

The Bay Plan is a numbering system that gives a cross-sectional view of the arrangement of containers on a vessel above and below the deck. It consists of 6 digits. The first two digits indicate the bay, the middle two indicates the row and the last two represents the tier.

How are container ships organized?

On container ships the position of containers are identified by a bay-row-tier coordinate system. The bays illustrate the cross sections of the ship and are numbered from bow to
